

## **How to Apply KLWP Theme**

### Step 1: Install Required Apps

- Install KLWP Live Wallpaper Maker from Play Store.
- Install KLWP Pro Key (required to load custom themes).
- Install Nova Launcher (recommended for best results).

### Step 2: Set KLWP as Wallpaper

- Long press on the home screen.
- Select "Wallpapers".
- Choose "Live Wallpapers".
- Select "KLWP".
- Tap "Set Wallpaper" for Home Screen.

### Step 3: Load KLWP Theme

- Open the KLWP app.
- Tap the menu (top left) → "Load Preset".
- Select the theme you downloaded (usually found in the "Exported" folder).
- Tap the save icon (disk icon) on the top right.

### Step 4: Nova Launcher Settings (Recommended)

- Long press home screen → Settings.
- Desktop → Grid: 9x5 (or as suggested by the theme).
- Desktop → Width Padding: None.
- Desktop → Height Padding: None.
- Desktop → Indicator: Hide.
- Dock → Disable Dock (OFF).
- Status Bar → Hide Notification Bar (ON).
- Page Count → 3 Pages (Swipe Left/Right for widgets, notifications, or shortcuts).
- Search Bar → Disabled.
- Gestures → Optional (set swipe up for app drawer, etc.).

### Step 5: Final Setup

- Go back to KLWP if alignment looks off → adjust in "Globals" or "Layers".
- Return to home screen and check theme.
- Done! Your KLWP theme is now active with perfect fit.

### Tips:

- Most KLWP themes are designed for 3-page setups (Left Page, Home, Right Page).
- Hide Dock and Notification Bar for a full immersive look.
- Always save inside KLWP after making changes.
